

This side Towards the Switch

FLETCHER Phased!

Can be used for any type of pickup.

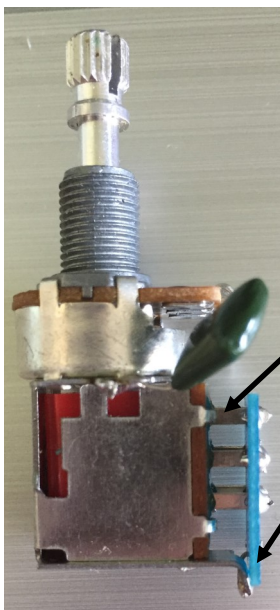

The **Hot** lead to IN
The Ground lead to OUT—Simple!
Shielding wires to any ground point, if present

Output to Switch or Pot,
depending on your schematic.

Remember to link the
Board, pot & bare wire
to circuit Ground.

Leave a gap between the board and
the pot base when soldering.

Bend back the metal tag and solder
this to the board Ground.
