

Solder this side Towards the

# FLETCHER

Series/Parallel

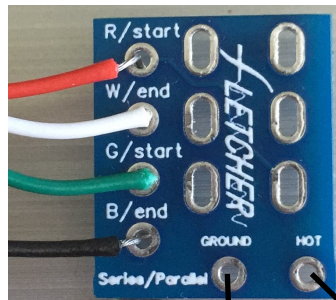

Single coil(ish) tones from a Bucker

All PCB boards are marked for FletcherPickups wire colours.

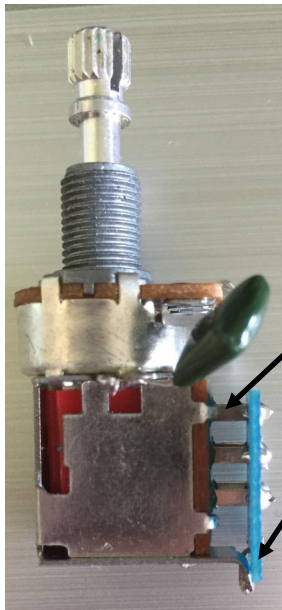

R W G B relate to the four lead wires, Red, White, Green & Black on a Humbucker.

Bare wire to ground always.

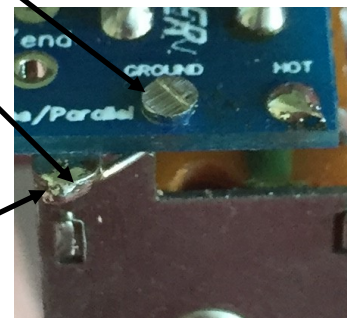

Output to Switch or Pot, depending on your schematic.

Remember to link the Board, pot & bare wire to circuit Ground.

Leave a gap between the board and the pot base when soldering.

Bend back the metal tag and solder this to the board Ground.
